PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in full-stack software engineering and machine learning. Experienced in designing scalable microservice architectures and building real-world applications using modern frameworks like Spring Boot, Node.js, and React. Passionate about leveraging data science and AI models to create intelligent, high-performance software solutions.

EDUCATION

B.E. Computer Science | Annamalai University 2023 - 2027

- CGPA: 8.30
- Relevant Coursework: Full Stack Development, Data Structures, Operating Systems, Database Management Systems, Core Java.

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript, TypeScript, Dart, C++.
- AI & Machine Learning: Scikit-learn, Pandas, NumPy, Prompt Engineering.
- Web & Mobile Development: HTML, CSS, React.js, Node.js, Express.js, Flutter.
- Frameworks & Technologies: Spring Boot, MERN Stack.
- Architecture & Tools: Microservices, Docker, Git, GitHub, RESTful APIs, Vercel, Render.
- Databases: MongoDB, MySQL, SQL.

PROJECTS

AI Career Assistant | Java, Spring Boot, Python, Docker, Microservices

- Architected a microservices-based application using Java and Spring Boot for user profile management.
- Developed and integrated an independent Python machine learning service to process candidate data and generate targeted career insights.
- Containerized the microservices environment using Docker and Docker Compose to ensure seamless deployment and scalability.

GsCars - Automobile Accessories Platform | MongoDB, Express.js, React, Node.js

- Engineered a full-stack e-commerce web application with a responsive Vite and Tailwind CSS frontend.
- Built robust RESTful APIs for backend operations, implementing secure user authentication via email OTP verification.
- Deployed the frontend via Vercel and the backend on Render for a production-ready environment.

Smart Lead Dashboard | React, TypeScript, Node.js, Express, MongoDB

- Built a secure lead management dashboard featuring a responsive React and TypeScript user interface.
- Developed a scalable backend system to handle user authentication and secure data processing.

Fitness Tracking Application | Flutter, Dart, Node.js, MongoDB

- Developed a cross-platform mobile application utilizing Flutter and Dart for logging daily calorie intake and workouts.
- Integrated a Node.js and Express backend to manage user fitness data through RESTful endpoints.

ACHIEVEMENTS

- Demonstrated strong problem-solving skills by successfully solving 200+ algorithm and data structure problems on coding platforms
